

Maharshi Gor

DEEP LEARNING RESEARCHER · SOFTWARE ENGINEER

3913 Commander Dr, Hyattsville, MD

☎ +1 (224) 281 9494 | ✉ mgor@cs.umd.edu | 🏠 mgor.info | 🐙 maharshi95 | 📺 maharshigor | 📧 PKCNveUAAAAJ | 🐦 @maharshigor

Skill Set

Research Interests: NLP, Computer Vision, Deep Learning, Machine Learning, Representation Learning, Adversarial Learning
Tools and Technologies: Python, Java, C/C++, R, Matlab, JavaScript, SQL, Redis, Neo4j, DGraph
Frameworks: PyTorch, TensorFlow, Apache Beam, Django, Scipy, Scikit-Learn, Pandas, Spring, Angular, AWS

Education

University of Maryland

M.S. IN COMPUTER SCIENCE

PH.D. IN COMPUTER SCIENCE — ARTIFICIAL INTELLIGENCE

College Park, MD, US

2021 - 2023

2021 - 2025

Visvesvaraya National Institute of Technology (VNIT)

B.TECH. IN COMPUTER SCIENCE AND ENGINEERING

Nagpur, India

July 2012 - May 2016

Research/Work Experience

Google Research

AI RESEARCHER, NLP | MENTORS: PROF. JORDAN BOYD-GRABER, PROF. WILLIAM COHEN

New York, United States

Aug. 2019 - Aug. 2021

- **Towards Deconfounding the Influence of Subject's Demographic Characteristics in Question Answering [EMNLP 2021]**
 - An **analysis study on Question Answering tasks**: Do subject's demographic characteristics matter when models answer a question from four prominent QA Tasks: NQ, SQuAD, QuizBowl and TriviaQA, and if yes what traits entail?
 - Are questions about some professions or gender easier than the others? What skews are presents in these datasets, and do these translate to model accuracies?
- **MATE: Multi-view Attention for Table Transformer Efficiency [EMNLP 2021, Oral]**
 - A novel architecture that **leverages the structure of web tables to create Transformer models that have both better inductive bias and a lower(linear) asymptotic memory footprint**, and allows them to scale to sequence lengths of more than 8000 tokens.
 - For HybridQA, a large-scale tabular Question Answering dataset that involves large structured and unstructured data, **we improve results by more than 19 points on accuracy**.

Video Analytics Lab

VISITING RESEARCHER | ADVISOR: PROF. R VENKATESH BABU

Bengaluru, India

Jan. 2018- Apr. 2019

- **GAN-Tree: An Incrementally Learned Hierarchical Generative Framework for Multi-Modal Data Distributions [ICCV 2019] 🔄**
 - A hierarchical tree framework for Generative Adversarial Networks (GANs) for learning multimodal disjoint data distributions supporting incremental learning of data samples from a new distribution and maintaining persistency across all versions
- **BiHMP GAN: Bidirectional 3D Human Motion Prediction GAN [AAAI 2019, Spotlight]**
 - A generative approach for 3D human skeleton sequences using a novel Discriminator architecture, enabling content loss in a probabilistic framework
 - Shows superiority, both in terms of qualitative and quantitative measures, over previously available state of the art methods for both long-term human motion generation and short-term forecastings.
- **Unsupervised Feature Learning of Action Sequences as Trajectories in Pose Manifold [WACV 2019, Oral]**
 - Modelled sequences of the pose embeddings as a trajectory in the pose manifold.
 - Achieved competitive state-of-the-art results for action recognition task with minimal supervision on labeled information while comparing against previous fully-supervised deep learning approaches.
- **Pose2Vec - Unsupervised Framework for learning 3D Human Pose embeddings 🔄**
 - Hierarchical human skeletal pose modeling framework, using novel variant of Generative Adversarial Networks (GANs), enabling one shot inference from skeleton space to latent space.
 - A Python Library for all preprocessing steps for human-skeleton related tasks implemented in Numpy and Tensorflow.
- **Multi scaled Protein Molecule Detection and Counting from an Image**
 - A business usecase project of Hyperworks Imaging Private Ltd in collaboration with Video Analytics Lab, IISc.
 - YOLO based Multi-scaled CNN architecture to detect and count molecules of radius ranging from 5µm to 200µm.

Amazon

SOFTWARE ENGINEER | AMAZON ANDROID APPSTORE

Bengaluru, India

Aug. 2017 - Dec. 2017

- Contributed to re-architecture of the back-end services for App Submission and Catalog Ingestion.
- Contributed to Database migration from Oracle to Postgres

Codenation Solutions

SOFTWARE / INNOVATION ENGINEER

Bengaluru, India

July. 2016 - July. 2017

- **Semantics Addition and Relevance Improvement of a Search Engine of an intra-org social network using a Knowledge Graph.**
 - Achieved Word Sense Disambiguation through Lexical and Topological Query Enrichment using Community Clustering on KG.
 - Reduced the TP90 response time from 8s to 500 ms
- **Fuzzy Classification System for source code commits of projects on Version Control Systems.**
 - Developed a commit classification system over a VCS and automated it as service for continuous provision of comprehensive details of the kind of contribution made by a developer on/across project(s)
- **A Gamification Framework around agile processes for achieving enhanced productivity of software developers.**
 - Product-designer and primary architect of the core framework.
 - Created 20 new code quality metrics for measurement of various categories of developer productivity.
 - Introduced, developed, and shipped the prototype to the client in 6 months period.

Honors & Awards

2021 **Dean's Fellowship - PhD, CS (AI Track)**, University of Maryland, College Park

2019 **Microsoft Research Travel Grant**, AAAI 2019

2019 **ACM India-IARCS Travel Grant**, AAAI 2019

2018 **Country Rank (United States) 43, across 100,000 active users**, CodeChef Rankings

[Profile Link](#)

2013-16 **Top 60 every year, across over 6000+ teams**, ACM ICPC (International Collegiate Programming Contest) on-site Asia Regionals

2013-15 **Consistent 1st prize Winner**, Freak-O-Matix, the open mathematics Olympiad at VNIT (Undergrad)

2009-11 **Country Rank (India) 22, State Rank in top 5**, Indian National Mathematics Olympiad (INMO)

Activities

2020-21 **Reviewer**, ICLR 2022, NeurIPS 2021, ACL 2021, EMNLP 2020, ICML 2020, ACL 2020

New York, US

2018 **Problem Setter**, MindSpark 18 Codeathon, organized by College of Engineering, Pune on Codechef.

Pune, India

2017 **Problem Setter**, [CodeAgn 2017](#) - The All India Hiring Challenge for Codenation Solutions.

Bengaluru, India

Certifications

2018 **Five course Specialization on Deep Learning, deeplearning.ai**, offered by Andrew Ng

[Certificate Link](#)

2017 **Machine Learning, Stanford University**, offered by Andrew Ng

[Certificate Link](#)

2017 **Introduction to Data Science in Python**, University of Michigan
